World Lore:

World Info:

Non-Monster Population: 1.6 Billion
Monster Population: 7.2 Billion
Sea Life: Largely Unharmed

Current Years:

492 Years Since the Start of The Great Shift
318 Years Since End of The Great Shift
308 Years Since the Start of The Gates Disaster
179 Years Since the Great Demonic Surge
142 Years Since the Dorrin Revolution
35 Years Since the End of The Gates Disaster

Ages:

1. The Great Shift

A sudden, catastrophic movement of the world's tectonic plates causes continents and countries to collide and merge into a Pangaea-like supercontinent. Massive portions of civilization are destroyed, leaving behind ruins. The resulting geological upheaval causes dramatic and unpredictable changes in global temperatures and climates.

Also known as the **First Catastrophe**, it kills approximately **1.5 billion people**, consisting almost entirely of the elderly.

The Great Shift marked the destruction of the old world. Entire countries are erased as their territories are crushed together, split apart, or buried beneath newly formed terrain. Cities are destroyed by earthquakes and the violent movement of the land itself, while coastal regions are devastated by enormous changes in the oceans.

The elderly suffer the greatest losses, unable to survive the sudden environmental changes and the collapse of civilization around them. With much of the older population gone, an immense amount of accumulated knowledge and experience is lost alongside them.

The surviving population is left scattered across the newly formed world, surrounded by the ruins of the civilization that existed before the Shift.

2. The Gates Disaster

Ten years before the Gates arrived, humanity began becoming **attuned to the elements**.

The four elemental origins were **Air, Fire, Water, and Earth**, with numerous sub-elements and variations developing from them. However, elemental attunement was not universal. Only approximately **one in every three people** could manifest an element, and each person only being able to specialize in that one specific element.

The sudden emergence of elemental abilities creates another source of instability in an already devastated world.

The ruins of the old civilization are already dangerous, and now ordinary people possess abilities capable of causing even greater destruction. Conflicts between elemental users become increasingly common, with some using their powers for violence, intimidation, and survival.

Then, the **Gates arrive**.

Through them come creatures of countless forms and horrors, as well as **Otherworlders from ruined worlds** and the sudden **Immortalization** of multiple people, eventually becoming known more as **Deities**.

The arrival of the Gates turns an already unstable world into an open battlefield.

Humanity is forced into conflict with creatures from beyond their world, while the Otherworlders themselves are far from united. Some fight humanity, while others fight amongst themselves.

The world effectively becomes a **free-for-all**.

What begins as chaos eventually develops into centuries of warfare.

The Gates Disaster lasts for **hundreds of years**, with generations being born into a world where war is simply considered a normal part of existence.

3. The Great Demonic Surge

The centuries of violence eventually begin to produce consequences beyond the destruction of civilizations.

The sheer amount of bloodshed and chaos causes the monsters of the world to grow increasingly powerful.

The strongest among them begin to become **demonized**.

Creatures that were already ancient become even more powerful, while others transform into beings far more dangerous than the monsters that came before them.

The conflict that had once been fought between humans, Otherworlders, and creatures begins to create a new threat that threatens **all sides**.

The demons grow powerful enough to overwhelm the forces that had previously fought amongst themselves.

The wars that had lasted for centuries now contribute directly to the destruction of the world.

The **Aloi Alliance** is formed in response to the growing demonic threat.

The factions that had spent generations fighting one another are forced into a temporary alliance against the demons.

The alliance manages to shatter the demonic front.

However, the victory does not come from the alliance alone.

The **Elementals** tear through the remaining demonic forces, finally bringing the Great Demonic Surge to an end.

The demons are defeated.

But the world is left simply with a war still ravaging the lands.

The Great Demonic Surge becomes another layer of destruction added to the already centuries-long Gates Disaster.

4. The Dorrin Revolution

Following the Great Demonic Surge, oppression among the surviving populations continues.

Humans, Elmen, Stros, and Blerans begin a revolution against their oppression, led by the Deity of Shifting Lands, **Dorrin**.

The four races fought together under Dorrin's leadership, challenging the powers to attain the freedom they deserved

The revolution's victory eventually led to the formation of **Tonor**, a massive city established along the borders of the former Saudi region.

Tonor became one of the larger cities of the new world and a major consequence of the revolution.

However, the revolution does not erase the destruction that came before it.

The world is still trapped within the wider Gates Disaster.

The races that fought alongside one another during the revolution are still surrounded by the remnants of centuries of warfare.

The revolution becomes another major conflict within an already endless war.

5. The End of The Gates Disaster

After centuries of damnation, the Gates Disaster had finally reached its end.

The world has suffered through the Great Shift, hundreds of years of conflict, and the Great Demonic Surge.

The various races have lost the majority of their populations.

The world has been repeatedly devastated by war.

Eventually, the surviving races agree to end their wars.

The decision is not born from prosperity or peace.

It is born from **destruction**, the beings fighting them gone or tired or the senseless war.

The Gates Disaster finally ends after the destruction of the majority of the world's populations.

The survivors are left with a world that has been permanently scarred by centuries of conflict.

The old world is gone.

The civilizations that existed before the Gates are mostly gone.

The creatures and races that survived are remnants of populations that once numbered far greater.

And the world that remains is built upon the ruins left behind by **three major catastrophes and centuries of war**.

Player Lore:

During the first years of the Elemental Surge, Karl, like many other beings, became immortal with the passage of time. He was among those blessed with the ability to control one of the four Origin Elements: **Air**, despite being an origin element, it was not special in the slightest, only being considered as One of the Many other elements, he fought during the eras and gained the epitaph “The Deity of Wandering Skies” due to him being able to his immense control over air and winds, creating typhoons, tornadoes, and all sorts of weather phenomena, and his wandering lifestyle, never staying in one place for too long.

Said to be one of the 24 Strongest Beings In the entire world

4 Deities -
The Deity of Living Earth,
The Deity of the Blazing Sky,
The Deity of Wandering Skies,
The Deity of the First Anvil

12 Other-Worlders

2 Humans -
Argoli The Lord of Stars(Sorcerer)
Duran, Son of Vala(Barbarian)

2 Ancients -

The First Ember(Demonized Elemental) (Absolute Enemy of Wandering Skies)
The Last Cryptid(Komodo Dragon Cryptid)

4 Monsters -
Tropos the Sea Drake
Argrovoncre, Lord of Blood(Demon Lord of France)
Velnada, The Last Emperor Class Dragon
Crodovafren, Horde of Plagues (An entire horde of monsters)
